KEYWORDS

Front-End Development & Design
C# ASP.NET Development
SQL/MySQL Database Architecture
Mission

AngularJS Development
Product Development
Studio & Outdoor Photography

MISSION

To provide a level of quality in my work above and beyond the norm by using my unique combination of economics-based problem solving and computer science experience to solve any problem effectively and elegantly.

EDUCATION

Georgia College and State University, Milledgeville, GA
BS, Economics, Computer Science, GPA 3.3

May 2013

Karlstads universitet, Karlstad, Sweden
Study Abroad Fall 2011, Economics

Fall 2011

SKILLS

I aim to pride myself on the word I do, regardless of the company I am working at. I prefer a hands-on approach and use a flexible process to learn as I go. I can adapt to any situation and enjoy the challenge of problem-solving when faced with an objective I know nothing about.

I have extensive experience with enterprise-level, N-Tier C# back-end development. I also have good familiarity and passion for front-end design and coding in UI and UX elements for the web. My other strengths in the area are with client-side JS frameworks including AngularJS, Backbone, React, and EmberJS.

EXPERIENCE

Preparis, Inc – Crisis Management and Response SaaS

May 2012 - Present

Internship – Experienced the in's and out's of a SaaS startup, gaining valuable knowledge in product management and development.

Developer – Created a barebones social network geared towards the commercial real estate and property management industry using Sitecore, C#, and ASP.NET. To be utilized as a social tool and alternate channel for disseminating critical information during crisis situations. Worked extensively with front-end JS frameworks and UX design principles to prototype new website designs aimed at simple, intuitive navigation among a large pool of content.

GT eSports -- Top-Stack Development Contracting

October 2012 - Present

Architect, Back-End Development, Front-End Design and Development of Georgia Tech's eSports Association website and event site (GT Gamefest @ <http://gtgamefest.com>) Current work involves building a tournament and events platform for wider use based cutting edge technologies and client-side focused app development.

The Network, Inc. – Claim and Employee Reporting Intake

May 2010 - August 2011

Internship – A summer-long program focused on experiencing product management with a concentration in web application and development.

Product Management Associate – Developed a multi-lingual web application with DotNetNuke for international use as well as gaining experience in SQL database development and management.
